“Build responsible and effective Transparency between human and AI.”

Research Interest

I am a PhD candidate in HCI Lab at Hong Kong University of Science and Technology (HKUST) supervised by Prof. Xiaojuan Ma.

My research interest lies in Human-AI Interaction. I am especially interested in promoting **transparent communication** between humans and the black-box AI and investigating the trust issues (e.g., **trust calibration**) in human-AI collaboration. Also, I design computational models and run empirical studies to understand users' mental models in **AI-assisted decision-making** and machine (robot) teaching.
